16, 25 & 50MM VENETIAN BLINDS

Aluminium Venetian Blinds are a cost effective and flexible shading solution that provide multiple levels of light control with the simple open and close movement of the slat. The range features on trend colours, finishes and designs whilst maintaining the traditional favourites.

Features & Benefits

Colour Range:

16mm range: includes 5 Colours
25mm range: includes 27 Colours
50mm range: includes 5 Colours

Finishes:

Gloss, Satin and Perforated

Technical Specifications

Slat Composition

6011 Aluminium Alloy. High tensile bounce back.

Gauge Thickness

0.215mm ± 0.01mm (approx.)

Width

16mm, 25mm & 50mm

Headbox

16 and 25mm Aluminium Venetian Blinds use a 26mm wide x 26mm deep headbox rolled from 0.5mm aluminium zinc alloy coated steel finished in a Thermosetting Polyester Coating over a chromated primer, adding strength and rigidity to the headrail.

Stringtape

Woven to strict specification which allows you more slat overlap for light control.

Models

- Standard Aluminium Venetian
- TWI-NIGHTER® Venetian Blinds
- In-Between Glass
- Limited Edition

Standard Aluminium Venetian

In-Between Glass

TWI-NIGHTER® Venetian Blinds

Care and Cleaning

General Care

Dusting with a feather duster is all that is required to keep your blind looking good.

Stains

For the removal of dirt and grime, simply wipe slats with a sponge soaked in lukewarm water. If marks are still visible, add a little detergent. Then dry gently with a clean cloth.

Operating Options

Cord and Wand

Aluminium Venetian Blinds are supplied with a lift cord and tilt wand. The standard tilting mechanism is fitted with a unique protection to prevent the mechanism slipping and the ladder cords from being forced. Using the precise tilting mechanism the slats can be positioned to each desired closing position.

Motorised Tilt and Raise and Auto-tilt

The motorised option for Aluminium Venetians provides the ultimate in technology and operating comfort. The angle of the slats are adjusted to suit your requirements by a simple remote control. The Somfy® Tilt & Lift RTS Central motor has an integrated RTS receiver built into the motor allowing wireless communication without any additional accessories/receivers and can be powered by AA Lithium batteries. Being a 12V DC motor, it can be powered by either a DC power pack or a battery tube (8 x AA Lithium batteries). The motor is also compatible with all RTS control devices, including the Telis Modvar remote control. Available for 16mm and 25mm Venetians.

Specialty Shapes

Specialty Shapes, Cut Outs and Air Conditioning Cut Outs are available with the Standard Slimline and Micro venetian blinds. These include Sloping Bottom, Sloping Head, Sloping Head and Bottom.
